## Experience

### Ivy Flowers and Bouquet Shop (E-commerce)

#### Hands-on client for SEO Training - March - May 2023

We performed basic SEO skills and optimization for this client, including optimizing meta titles and meta descriptions, conducting keyword research, setting up Google Search Console (GSC) and Google Analytics (GA4), submitting the sitemap to GSC, indexing and reindexing pages, designing the website from scratch using WordPress, and building local citations.

### ZltotoSports (iGaming) - August - November 2023

This is my first SEO client in the entertainment niche, and the client is from South Korea. For this website, I created it on GoDaddy and designed it using WordPress. For optimization, I focused mainly on on-page SEO and local citations because the client's budget was limited.

### MyPortal Marketing Agency (Dental Clinic, Business Broker, Real Estate, E-Commerce) - January 2024 to March 2026

For this marketing agency, my role is an SEO Specialist who specializes in both on-page and off-page optimization. For on-page SEO, we conducted keyword research, competitor analysis, blog creation, and internal linking. In technical SEO, we fixed broken links and 404 errors, disallowed spam or unwanted URLs in the robots.txt file, indexed and reindexed pages, and optimized Core Web Vitals and page speed, especially on mobile. For off-page SEO, we handled scheduling Google Business Profile (GBP) posts, link building, and local citations. For local SEO, we optimized the GBP by ensuring NAP consistency, adding categories and subcategories, and listing products and services.
